SOFTWARE DESIGN

BCSE301P

Github repo: https://github.com/Sonali-999/softwareBCSE301P

Name	Sonali
Registration no	23bce1572
Lab no	0

PROJECT STATEMENT ID: SIH25131
PROJECT NAME:
STUDENT INNOVATION: SWADESHI FOR ATMANIRBHAR BHARAT - HEALTHTECH(25131)

ORGANIZATION:
AICTE

DEPARTMENT:
AICTE, MIC-STUDENT INNOVATION

DESCRIPTION:
Healthcare has become the most important service, though rural areas in india still faces a lack of proper medical facility and properly trained doctors for diagnosis. Medicare, a web-based app for disease diagnosis using a self-trained model that also keep track of the patients health.this helps bridge the developmental gap in rural areas. It will be using semi trained model and self trained model to study the content and diagnose, and will use pretrained model to process the dataset and train the model and normalize content.

Features:
1. one click issue submission with a image
2. automatically detects the symptoms/disease-daignosis
3. chat storage of registered patients
4. supports multimedia content
5. health track
